

MOSCLEAN IG1

Insect trap Garden for Outdoor

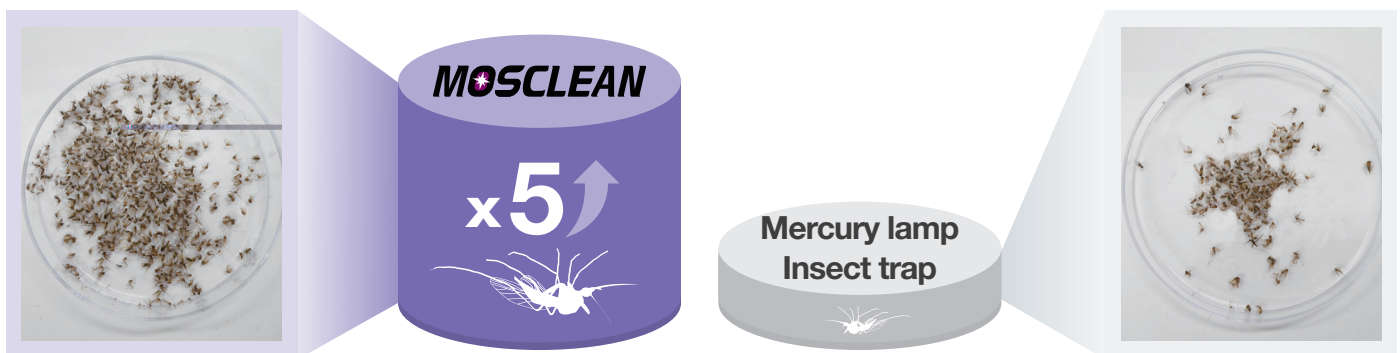

violeds Technology

Clean technology jointly developed by Seoul Viosys and SETi, as used on International Space Station.

Performance comparison

Catch over 5 times more *Aedes aegypti* mosquitoes, known to be a vector in transmitting ZIKA virus and cause microcephaly, than Mercury lamp Insect trap.

Dr. Philip G. Koehler. University of Florida, USA, Confirmed through experiment data

Non-Hazardous

No pesticides and no chemicals means that MOSCLEAN is safe for all the family.

Water Resistant

Water resistant, MOSCLEAN IG1 can be used outdoors with confidence even in the rain.

Wide Coverage Acre

With a 1 acre coverage, you can enjoy a backyard family gathering without mosquitoes.

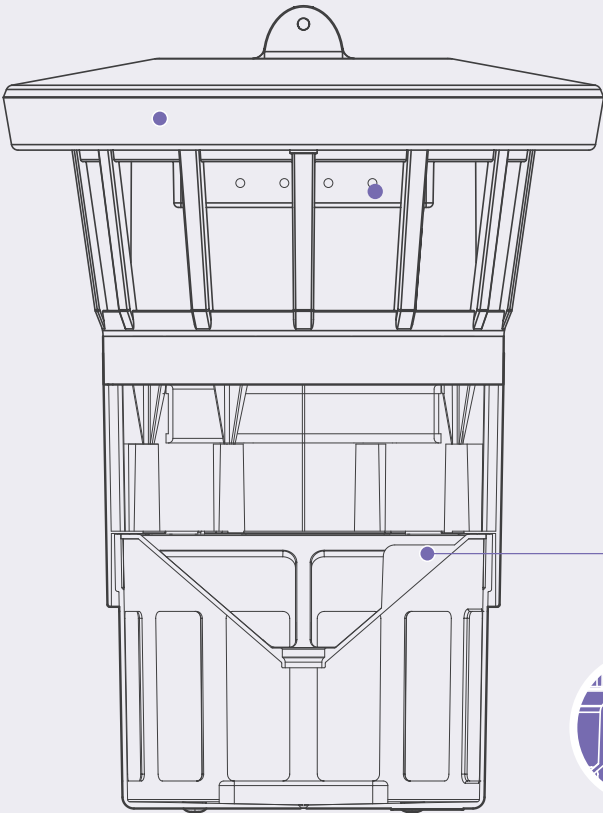

ROOF

Water resistant

Support effective outdoor use.

FAN

Powerful vacuum action fan traps insects inside the collection container where they dehydrate and die.

UV LED

Irradiate optimized ultraviolet wavelength to attract mosquitoes.

Cap

Prevents live insects from escaping.

Collection Container

Dehydrates captured mosquitoes by blowing air, usually within 24 hours.

Specification

Product name	MOSCLEAN IG1
Mode of action	Dehydration
Size	Ø260 x 320 mm (H)
Color	Black
Weight	1,580g
Attractant source	Optimized UV LEDs + CO ₂
Coverage	1 acre (4,046 m ²)
Power consumption	9W(About)
Power	DC 12V Adaptor, 100~240V
Installation	Hanging hole / Stand top
Remark	Water Resistant
